Cure It GRP Roofing System Installation Guide	Full Installation Video	An 18-minute complete guide to installing a Cure It GRP roof. An in-depth tutorial guide covering the five-stage installation process from preparing the roof area through to topcoat application.	https://youtu.be/mqIGU30O1kc
	Preparation Stage	A short 2-minute video focusing on how to prepare the roof area ready to install a Cure It GRP roof.	https://youtu.be/_xMU7chcUjA
	Stage 1 Installing the New Deck	This short video guide covers how to correctly lay the new deck for the roof area using OSB3 18mm T&G 2400mm x 600mm decking boards.	https://youtu.be/73vYS26euLQ
	Stage 2 Installing the GRP Trims	A short video guide on how to apply the GRP trims as part of the Cure It installation process. The following trims are used in this video – A200, B260, C100, D260.	https://youtu.be/P9Hfm_8WepY
	Stage 3 Detailing and Bandaging	This video is a guide to stage 3 of the Cure It installation process, detailing and bandage. It includes bandage preparation, mixing Cure It Resin and 'wetting out'.	https://youtu.be/My9LQ0rcFVk
	Stage 4 Laminating	A video guide focusing on stage 4 of the installation process, laminating. An in-depth guide to applying resin and reinforcement mat to the deck to form the waterproof laminate.	https://youtu.be/91ZZ7VksGLo
	Stage 5 Topcoating	This video guide covers the final stage of the installation process, topcoating (stage 5). It covers C7 corners, preparing the laminate and mixing and applying the topcoat to finish the roof.	https://youtu.be/aZ6qyxM3Oos
Detail Work – How to Guides	How to Install a Warm Deck Roof	A video guide demonstrating how to install the Cure It System as a warm roof. A warm roof system is used for roof spaces above habitable spaces.	https://youtu.be/TNjxUo0RQfl
	How to Prepare Pipe Extrusions (pipe outlet)	A short video guide demonstrating how to prepare pipe extrusions on a roof when applying the Cure It GRP Roofing System.	https://youtu.be/bGsdJEGmWCU

PLAYLIST	TITLE	DESCRIPTION	LINK
	How to prepare Pipe Extrusions (pipe inlet)	A video guide demonstrating how to prepare a pipe inlet (such as a drain from the roof) when applying the Cure It GRP Roofing System.	https://youtu.be/MWEg-IkDQB0
	Cure It & Velux	A video guide to installing a Velux flat roof widow integrated with the installation of the Cure It GRP Roofing System.	https://youtu.be/9W4AxqRhLZA
	How to Integrate a Cure It GRP roof with a Pitched Roof	This video demonstrates how it is possible to integrate a Cure It GRP roof where the flat roof joins a pitched roof. Flat Flashing (F300) is used.	https://youtu.be/748Klj0cW9o
	How to GRP a Parapet Wall using Cure It GRP	This video demonstrates how to GRP a parapet wall using the AT300EXT GRP trim with the Cure It GRP Roofing System.	https://youtu.be/UGNVxRjSYLU
	How to create an outlet through a parapet wall using Cure It GRP	Cure It GRP can be used to form outlets through a parapet wall. This video demonstrates how to use D260 GRP trims and Cure It to form an outlet.	https://youtu.be/N-y365HUyTg
	How to achieve a felt effect finish using Cure It Slate Granules	This video guide focuses on creating an exposed aggregate finish (felt effect) during the topcoating stage of the installation process. Cure It Slate Granules are used to achieve this effect.	https://youtu.be/06nzLOcpuXo
	How to achieve a coated (non-slip) aggregate finish using Cure It Slate Granules	A short video tutorial demonstrating how Cure It GRP can be used for walkways and balconies. Cure It Slate Granules can be used at the topcoating stage to provide a non-slip aggregate finish. 600gsm Reinforcement Mat used.	https://youtu.be/7wJkiHmBTY
	How to use a C2 Preformed Corner using Cure It GRP	This video guide demonstrates how to install a C2 external preformed corner with a D260 and B260 GRP trim. The C2 corner provides a neat finish to the roof area where the roof meets an abutting wall.	https://youtu.be/eFFboGkg3g0
	How to use a C3 Preformed Corner with Cure It GRP	This video guide demonstrates how to install a C3 internal preformed corner with a D260 GRP trim, when using the Cure It GRP System. The C3 corner provides a neat finish to the roof area.	https://youtu.be/zrxbLlKLZPw

	Creating Expansion Joints with an E280 Trim using the Cure It GRP System	This video demonstrates how to use the E280 Raised Ridge Roll trim (with C9A & C11D) to form expansion joints, required on large roof areas.	https://youtu.be/zacLCJEXxr4
Masterclass Series	Masterclass – Bonding Cure It to other Materials	Filmed live and demonstrates how to apply Cure It to other materials including plastic piping and a lead surface.	https://youtu.be/LuRBd3r0nMk
	Masterclass – Corners & GRP Trims	Filmed live and demonstrates how to form corners using GRP trims to create neat finishes to a roof area. Features how to apply a B Trim for a bay window roof. Including how to install the C1, C2 and C3 preformed corners.	https://youtu.be/wNhktDNMm0w
	Masterclass – Bonding to concrete	Filmed live and demonstrates how to apply Cure It to concrete surfaces. The tutorial highlights how to fix GRP trims to concrete and how to correctly apply Cure It Concrete Primer.	https://youtu.be/LtKaqa3cEmc
	Masterclass – Creating a Parapet / Step Detail using Cure It	Filmed live and demonstrates how to create step details and using Cure It on parapet walls. The video highlights how to use the G180 Gully Trim.	https://youtu.be/n_gZQZd5bVA
	Masterclass – Troubleshooting (correctly installing Cure It)	Filmed live and demonstrates how to correctly install the Cure It System. Focusing on installing the deck including fixing joists and firings correctly and applying Cure It Resin correctly to avoid issues.	https://youtu.be/gf3A3jYZHg4
	Masterclass – Topcoat and Finishes	Filmed live and demonstrates the various topcoat and roof finishes available. Also covers Colour options available and the best method for applying slate granules for a neat finish.	https://youtu.be/v41RoVR9UZg
	Masterclass – Expansion Joints using the E280	Filmed live and demonstrates how to incorporate expansion joints for a large roof. The tutorial includes correctly preparing the joists, the deck and applying the laminate.	https://youtu.be/O_etN_pkyfo
	Masterclass – Creating Walkways and Balconies	Filmed live and demonstrates how to use Cure It for balconies and walkways. The tutorial features how to laminate balustrades on the deck.	https://youtu.be/L3N77zyYSWU
